

Dear Netcong School Community Member:

All parents and guardians will need to complete a survey committing to either hybrid or remote learning for their children for the start of the school year. Families will be able to change to either remote learning or hybrid learning at the start of each new marking period. We anticipate being able to send the survey out tomorrow and surveys must be completed no later than August 14, 2020, for planning purposes.

Prior to making your decision for either in-person or remote learning, we want to be able to give parents and guardians an idea of what remote learning will look like. Our restart and recovery plan already details what in-person learning will look like. We are putting information together as to what our proposed virtual learning will look like and will share that out tomorrow with the link to complete the survey.

Thank you for your patience.

Sincerely,

Kathleen E. Walsh, Superintendent
